Hermes AI KYC Report

Radcipher

June 28, 2025

Prepared by: [Radcipher]

Protocol Summary

Hermes AI is a decentralized, community-first investment intelligence protocol powered by a 10-factor AI-driven scoring engine. It delivers real-time, on-chain dividend distribution while analyzing opportunities across NASDAQ, BIST100, and the crypto markets. Backed by GPT-4o for advanced insight generation, Hermes AI combines traditional finance and Web3 into a unified platform designed to help users make smarter, AI-assisted investment decisions.

Disclaimer

The Radcipher team has conducted this KYC verification with due diligence based on the information and documentation provided by the project team. While every reasonable effort has been made to ensure the accuracy and reliability of the verification process, Radcipher does not guarantee the legitimacy, honesty, or future actions of the individuals or entities involved. This report is not an endorsement, investment advice, or a guarantee of project safety. Stakeholders should conduct their own research and exercise caution when engaging with any project.
